Quality Assurance System

Revisione 01

06/06/2025

The Management of CMT Atomizers Srl has set itself the objective of maintaining a leading position in competitiveness and reliability in both the domestic and international markets. The strategy chosen by the company is aimed at research, care, and close attention to the characteristics of the products and services it intends to offer to its reference market, in order to increase the level of Customer satisfaction.
In order to achieve and maintain the established objectives over time, the Company adopts a Quality Management System based on the UNI EN ISO 9001:2015 standard. The Business Management System has been developed to ensure the effective and efficient use of resources.
In line with these principles, this Policy defines the general guidelines of CMT Atomizers for the implementation of the Quality Management System.

Directives and Reference normative

• Adopt and maintain an effective Quality Management System for processes, products, and services within the operating context, in compliance with applicable mandatory requirements, both for atomizers installed in non-ATEX classified areas and for those required to comply with ATEX Directive 2014/34/EU; products suitable for contact with food have also been taken into consideration in accordance with the regulations on "materials and articles intended to come into contact with food" (M.O.C.A.).
• Select and qualify suppliers of products and services that have an impact on the final quality of processes and products, involving them—within the scope of their competence—in the achievement of company objectives.
• Understand and strengthen relationships with Customers and other interested parties, improving their level of satisfaction through products and performance in line with expectations.
• Define the responsibilities assigned to all company functions, verifying that they are understood and applied.
• Define continuous improvement objectives and periodically monitor the results achieved, sharing them with interested parties.

More generally, the Company is committed to ensuring that the products supplied meet the following requirements:

- They represent a fully Made in Italy product, with a single operating site in Italy and components manufactured by Italian subcontractors, as well as commercial components purchased from Italian third parties that guarantee, insofar as can be verified, production in Italy or, where produced by foreign companies prompt availability through Technical Assistance.
- They are considered reliable.
- They can be serviced..
- They comply with Customer needs and expectations, including appropriate cost levels.
- They comply with legislative and mandatory requirements, according to the reference market.

The managers of the Operational Units and Central Functions of CMT Atomizers must implement and disseminate the commitments and directives listed above and develop activities aimed at achieving company objectives and the continuous improvement of the Quality Management System.
This Policy must be made available to all internal and external interested parties. The Company promotes its dissemination through various forms of communication and distributes it to anyone who requests it.
